D.12 PROJECTORS IN CLASSROOMS

PES's Engineering College has always made sure that its faculty and students have access to all the necessary infrastructure, including buildings, machines, software, books, and other educational materials. As essential instruments for academic and technical presentations, learning resources such as projectors, K-Yan Devices play a crucial role in improving the learning experience inside engineering institutions. Professors and instructors frequently use these devices in classrooms and lecture halls to show intricate engineering diagrams, simulations, and ideas onto enormous screens. Modern projectors' high resolution and clarity allow students to better visualize complex engineering designs, which in turn improves their grasp of the subject. Consequently, it has established a remarkable, cutting-edge infrastructure with contemporary facilities and learning materials in accordance with the standards set by statutory agencies like as the UGC, AICTE, and JNTUGV. The College is firm in its belief that sufficient and appropriate infrastructure will pave the way for the intellectual growth and development of its teachers and students, which in turn will foster innovation.

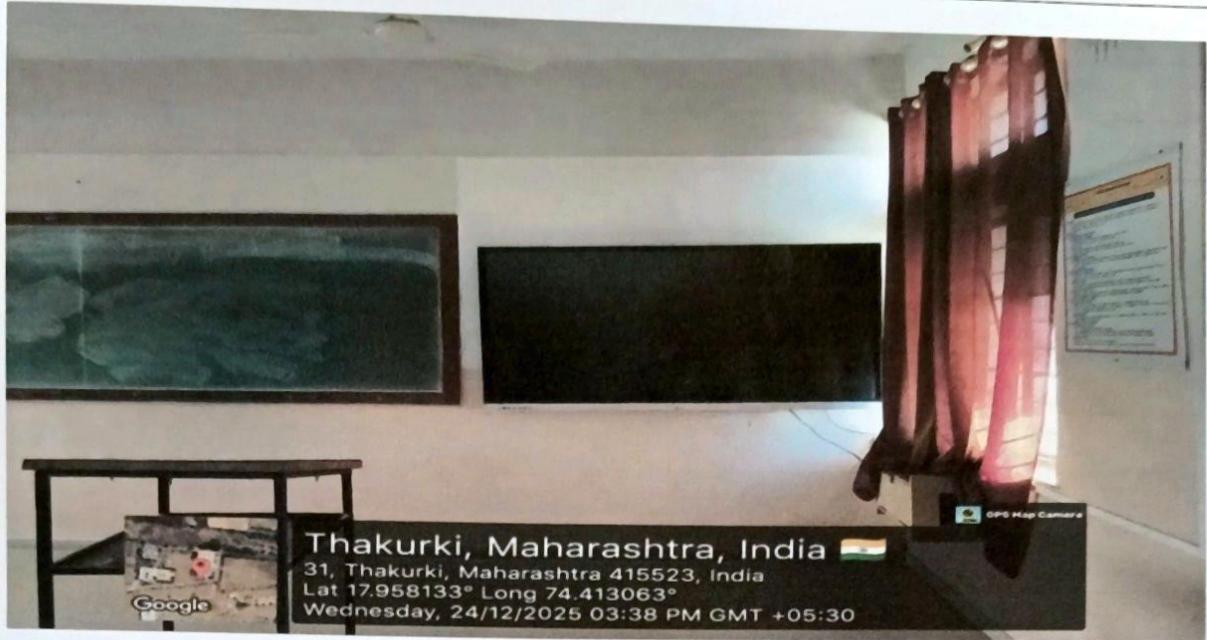

Below mentioned are the details of projectors in classrooms:
