- ◆ Non-teaching staff are given a target of minimum 3 online courses and one training every year.

EXPECTED OUTCOME

It is strongly believed and expected that the Comprehensive Training Program as envisaged in this policy document if properly implemented, will improve the quality of technical education provided by the Institute. The institutional environment, discipline and motivation of students/ teachers will also boost up, thus improving the quality of teaching-learning processes. The grooming in professional skills, values and attitudes will have a profound impact on shaping up the young minds and transforming them into socially responsible technical professionals.

Organization of continuous in-service training programs will help the teachers to keep themselves abreast with the latest developments and also correlate their teaching to the prevailing practice and indigenous development . It will also promote a culture of continuous learning from the seniors and ensure a cohesive teamwork within the department as well as institutions. A major area of student-teacher interaction outside the classroom, which is presently conspicuous by its absence will also develop, enabling proper mentoring, counselling and healthy personality development among the students.

"Educationists should build the capacities of the spirit of inquiry, creativity, Entrepreneurial and moral Leadership among students and become their Role Model."

APJ Abdul Kalam
