### Foreword:

I have great pleasure in publishing this edition of newsletter of College of Engineering, Phaltan. Phaltan Education Society's College of Engineering Phaltan commenced with a dream of holding the hands of students of rural area around Phaltan and making excellent quality education available to them at their doorsteps. Within a short span, it has risen to the position of being a prestigious Engineering College and it is a great exciting experience to see that in a barren land of 15 acres where once stillness and silence ruled now it is alive with life and buzz of activities that are definitely aimed to a noble end and purpose.

The infrastructure of our college is made available as per the rules of AICTE. Our dedicated faculties, well-furnished laboratories and professional culture in the campus provide education of advanced cutting edge technologies to create competent human resources to tackle the complex problems of modern era and good citizens for the better future of the country.

**Number of Attendant:** 03

**About:** - Regex Technologies, Phaltan

Regex Technologies is a global leader in technology, engineering, consulting & digital services. We empower clients in different countries to traverse their digital transformation. Our always learning agenda drives their continuous improvement through building and transferring digital skills, expertise, and ideas from our innovation ecosystem. Our group is passionate to provide timely, reliable, implementable and user-friendly digital platform.

A software life cycle model (also termed process model) is a pictorial and diagrammatic representation of the software life cycle. A life cycle model represents all the methods required to make a software product transit through its life cycle stages. It also captures the structure in which these methods are to be undertaken.

## Need of SDLC:

Team is developing a software product, there must be a clear understanding among team representative about when and what to do. Otherwise, it would point to chaos and project failure. This problem can be defined by using an example. Suppose a software development issue is divided into various parts and the parts are assigned to the team members.

## Stages of SDLC :

### 1. Planning and requirement analysis:

Planning for the quality assurance requirements and identifications of the risks associated with the projects is also done at this stage.

### 2. Defining Requirements :

Once the requirement analysis is done, the next stage is to certainly represent and document the software requirements and get them accepted from the project stakeholders.

### 3. Designing the Software :

The next phase is about to bring down all the knowledge of requirements, analysis, and design of the software project.

### 4. Developing the project :

Developers have to follow the coding guidelines described by their management and programming tools like compilers, interpreters, debuggers, etc. are used to develop and implement the code.

### 5. Testing:

After the code is generated, it is tested against the requirements to make sure that the products are solving the needs addressed and gathered during the requirements stage.

## Report of “Machine Learning ” Guest Lecture.

### Guest Lecture Details:

**Subject of Guest Lecture:** Machine Learning.

**Date of Lecture:** 29/05/2023

**No of Faculty Members:** 01

**No. of Students:** 73 (TY. B.Tech Computer)

**Adjunct Faculty:** Mr.Vivek Patil, (VIIT-Pune)

**Organized By:** Computer Engineering  
Department

#### Objectives:

- To give overview and clear Concepts of machine learning.(Unit 2,3)

To give knowledge of machine learning problems and diff Algorithms

#### Summary of Guest Lecture:

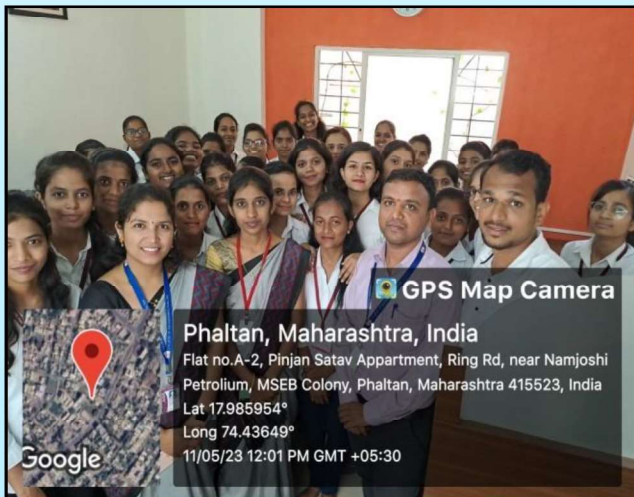

Computer Engineering Department has organised guest lecture on Machine learning on 29<sup>th</sup> May 2023. The main motive of this lecture to gain knowledge about machine learning problems and different Algorithms. Total 73 students of computer department had attended this lecture. The guest lecture was organized and accompanied by Prof.S.D.Patole. This lecture was started at 12.30 am with good support and cooperation from Mr.Vivek Patil were explaining the concepts of clear Concepts of machine learning..

### 6. Deployment:

Once the software is certified, and no bugs or errors are stated, then it is deployed. Then based on the assessment, the software may be released as it is or with suggested enhancement in the object segment. .

### 7. Maintenance:

Once when the client starts using the developed systems, then the real issues come up and requirements to be solved from time to time.

We are very thankful to Hon. Principal Prof. Dr. N.G. Narve and our department HOD Prof. A. A. Hipparkar, for their continues motivation and support for facilitating such activities in our department..
